

HEAVY MACHINERY & IT SOLUTIONS

NESHTECH LIMITED COMPANY PROFILE

Your Partner in Machines & Technology

Inside: who we are, what we build, and how we support your projects.

Director's Message

Welcome to Neshtech Limited.

When we founded Neshtech, we looked at the two most critical drivers of the Kenyan economy: the rapid development of our physical infrastructure and the explosive growth of our digital ecosystem. We realized that modern businesses do not operate in a vacuum; they need solid ground to build on and secure networks to operate in.

At first glance, Heavy Machinery and IT Security may seem like worlds apart. One deals in steel, earth, and diesel; the other in code, clouds, and encryption. But at Neshtech, we see them as two sides of the same coin: Reliability.

Whether you are a contractor needing an excavator to clear a site before the rains come, or a bank manager needing to secure client data against a cyberattack, your need is identical, you need a partner who guarantees uptime. You need systems that work when you turn the key, and you need protection that holds firm when tested.

Our philosophy is simple: We handle the infrastructure so you can handle the business.

We have built a unique culture where certified machine operators and certified ethical hackers share the same values of precision, safety, and integrity. When you partner with Neshtech, you are not just hiring a service; you are engaging a team that is obsessed with keeping your project moving and your data safe.

Thank you for trusting us with your foundations—both physical and digital.

Executive Summary

Neshtech Limited is a dynamic, dual-sector solutions provider incorporated in Kenya. We bridge the gap between physical development and digital security. We were founded on a singular promise: Reliability. Whether moving earth on a construction site or securing sensitive financial data in the cloud, our clients rely on us to minimize risk and maximize uptime.

Our unique business model allows us to serve a diverse portfolio of clients:

- Construction & Mining: Road contractors, civil engineers, and developers requiring heavy earth-moving equipment.
- Corporate & Public Sector: Banks, Telecommunications firms, and Government Directorates requiring military-grade network security and forensics.

Our Commitment We deliver distinct value through our two specialized divisions. Our Heavy Machinery Division guarantees maintained fleet availability and certified operators. Simultaneously, our IT Division ensures data integrity through ISO-standard security protocols.

Why You Should Choose Us?

Dual-Domain Expertise

Most companies specialize in just one area, but Neshtech bridges the gap between the physical and digital worlds. By partnering with us, you streamline your operations, gaining a single, reliable provider for both your heavy construction needs and your high-level corporate security.

Certified & Compliant

We reduce your operational risk by strictly following the law. Our heavy machinery operators are fully NTSA-certified for site safety, and our IT solutions adhere rigidly to the Data Protection Act (2019). With Neshtech, you get professional results without the liability.

Rapid Mobilization

Your project timeline cannot wait for slow logistics. We maintain our own transport network, allowing us to deploy heavy machinery or dispatch IT crisis teams to your location anywhere in Kenya within 48 hours. We don't just sign contracts; we arrive on-site ready to work immediately.

"Zero-Downtime" Guarantee

We understand that every minute of delay costs you money, whether it is a stalled project or a crashed server. Our mobile mechanics and network engineers work around the clock to ensure your excavators keep moving and your data stays accessible. We are obsessed with maintaining your operational speed.

Company Vision & Mission

> Vision

To become East Africa's most trusted infrastructure partner, recognized for driving national development on two fronts. We envision a future where Neshtech is the primary force powering the physical construction of the nation through superior heavy machinery, while simultaneously serving as the guardian of the digital economy through world-class cybersecurity standards.

> Mission

Our mission is to empower our clients by strictly eliminating downtime and risk. We achieve this by deploying high-performance machinery that ensures construction projects stay on schedule, while implementing proactive security protocols that prevent data breaches before they happen—ensuring your operations remain robust both on the ground and online.

Our Services

Neshtech Limited offers a unique dual-service portfolio that bridges the critical gap between physical infrastructure development and digital security management. We provide a comprehensive range of solutions, from high-performance heavy machinery leasing for construction projects to advanced cybersecurity protocols that safeguard corporate assets. By integrating these essential services, we ensure our clients achieve operational excellence with zero downtime on the ground and total data integrity online.

Heavy Machinery Division

Our machinery division is built for endurance and precision, supporting road works, mining, and large-scale infrastructure projects. We specialize in the leasing of Excavators and Earthmovers, offering flexible "Wet" and "Dry" hire rates to suit your specific project budget. With a fleet maintained for maximum uptime and a team of NTSA-certified operators, we guarantee rapid mobilization and expert handling of bush clearing, trenching, and foundation excavation tasks.

IT Solutions & Security

Our technology division acts as a fortified shield for your organization, protecting sensitive data across banking, telecommunications, and public sectors. We deliver end-to-end security through Network Defense, Digital Forensics, and Data Governance, ensuring that your proprietary information remains secure in the office, in the cloud, and on the go. From preventing unauthorized access to investigating complex fraud, our certified experts provide the intelligence needed to navigate the digital landscape safely.

Heavy Machinery & Leasing

Our Heavy Machinery Division supports the backbone of Kenya's infrastructure. We offer flexible leasing options ("Wet" or "Dry" rates) tailored to project timelines and budgets.

Our Fleet Capabilities

- Excavation & Earthworks: 20T - 30T Excavators for trenching, foundation digging, and bush clearing.
- Site Preparation: Graders and bulldozers for leveling and road mapping.
- Logistics: Low-loader transport services for rapid site mobilization.

Why Hire With Us?

- Zero Downtime Policy: We deploy mobile mechanic units to ensure immediate repairs on-site.
- Certified Operators: All personnel are NTSA-certified, experienced in complex maneuvering and site safety.
- Flexible Contracts: Daily, Weekly, and Monthly rates available.

IT Solutions & Security

In an era of cyber threats, Neshtech acts as your digital shield. We specialize in protecting corporate data in the office, in the cloud, and on the go.

Network Security: Next-Gen Firewalls (NGFW), Intrusion Detection Systems (IDS), and secure VPN configurations for remote work.

Digital Forensics: Fraud investigation, data recovery, and incident response for banking and corporate fraud cases.

Data Governance: Implementation of Data Loss Prevention (DLP) strategies to secure intellectual property and client records.

Endpoint Protection: Advanced anti-ransomware and malware defense for all company devices.
